Ohio Valley Voices’ mission is to teach children with hearing loss to listen and talk. Our primary goal is for children with hearing impairment to leave our program speaking within normal limits and reading at or above grade level. Our vision is for all children with hearing loss to have a bright future with endless possibilities. We provide early intervention, oral deaf education through second grade, intensive speech-language therapy, parent education, and support groups for families. We offer a 1:3 therapist to child ration and complete audiology services, including daily maintenance/repairs on children’s cochlear implants and/or hearing aids.

Ohio Valley Voices is seeking a part-time to full-time speech-language pathologist or deaf educator to work primarily in our early intervention program. The early intervention program is a year-round program. Job responsibilities would include:

- individualized therapy with toddlers
- group therapy with toddlers
- individualized parent education sessions with toddlers
- individualized therapy with infants and their families
- administration of standardized assessments
- participation in Individualized Family Service Plans
- data keeping and tracking

Additional responsibilities may be added depending on whether the job is part-time or full-time. Additional responsibilities would be with individualized assessments and therapy with children aged 3-8.
