Audiology Clinical Educator - Clinical Assistant Professor

POSITION SUMMARY
The Department of Communicative Disorders and Deaf Education at Utah State University (USU) invites applications for a 12-month non-tenure track (term) appointment in Audiology (AUD) at the Clinical Assistant Professor level beginning June 2018. The successful candidate will be a member of the AUD Clinical Education Program team supervising graduate students in clinical service delivery for pediatric populations. This position will involve significant inter-professional education (IPE) opportunities with Sound Beginnings, USU’s on-campus Listening and Spoken Language early childhood program for children who are deaf and hard-of-hearing, and at the College level.

RESPONSIBILITIES
1. Provide best practices in direct service, and clinical education for graduate students at the USU Pediatric Audiology and Cochlear Implant Clinic
2. Participate in selection of practicum assignments for students, and facilitate contracts and communication with clinical partners in the community
3. As a member of the Clinical Education team, teach clinical education course work and electrophysiology
4. As a member of the Clinical Education team, develop, update, assess, and assure compliance with clinic policies and procedures and maintain clinical records as required by CAA program accreditation
5. Provide service to department, university, community, state, and profession

MINIMUM QUALIFICATIONS
Candidates must have earned a Doctor of Audiology (AuD), hold a current ASHA Certificate of Clinical Competence in Audiology, and a current (or eligible) Utah State license in Audiology. Candidates must have a minimum of three year of experience as an AuD-CCC specializing in pediatrics, with proficiency in infant diagnostic assessment procedures, pediatric behavioral assessment procedures, and pediatric amplification procedures. Candidates will have excellent problem-solving, organization, interpersonal, counseling, oral, and written communication skills with an ability to prioritize, plan, and organize work independently and an ability to think strategically and to recognize new opportunities.

PREFERRED QUALIFICATIONS
Preference will be given to candidates with experience in cochlear implant mapping, four or more years of clinical supervisory experience, experience working in a CAA-accredited academic program, experience working with inter-professional initiatives in human service fields, experience with AuD billing, tracking, and electronic medical record software, and bilingual in English and Spanish.

DEPARTMENT AND UNIVERSITY
Utah State University is a Carnegie Higher Research Activity (R2) institution. USU is the largest public residential campus in Utah, enrolling approximately 18,000 students at its main campus in Logan. The College is ranked 6th in the nation in total research dollars. The department offers campus and online bachelor's degrees in Communicative Disorders, master's degrees in Speech-Language Pathology and Deaf Education, a clinical doctorate in Audiology, and PhD tracks in Disability Disciplines and Neuroscience. Current externally funded research, training, and technical assistance projects in the department total over $5 million.

COMMUNITY
Logan, Utah is situated in the scenic high mountains of Cache Valley in northern Utah. Outdoor activities nearby include excellent hiking, rock climbing, biking, skiing, and water sports. Regional areas of interest include Yellowstone National Park and Jackson Hole, Wyoming to the North and the red rock country of Arches National Park and Moab to the South. Logan is a small city located in a growing community of approximately 113,000 inhabitants, located 80 miles north of Salt Lake City.

USU offers a competitive salary that is commensurate with qualifications and experience plus an excellent benefits package.
